

Portal Dates Quick Reference Guide

Your cheat sheet for the year's energetic windows

Portal	When	How to Use It
1/1, 2/2 ... 11/11, 12/12	Repeating date each month	Quick check in, gratitude, small intention setting. 11/11 is the standout since master numbers pack extra punch.
Imbolc	February 1	Gentle new beginnings, first stirrings of spring.
Spring Equinox	Around March 20	Reset and recalibrate. Great for planting new intentions.
Beltane	May 1	Fertility and creativity energy. Plant seeds, literal or metaphorical.
Wesak Full Moon	May 1, 2026 (falls on the full moon in Taurus each year, so the date shifts yearly)	Tied to Buddha energy. Strong time for deep meditation or spiritual study.
Summer Solstice	Around June 21	Peak of light. Celebrate how far you have come and step into visibility.
Lughnasadh	August 1	First harvest. Acknowledge early progress on what you started at Imbolc.
Lion's Gate Portal	Peaks around August 8	Sirius aligns with sun and earth. Manifestation, personal power, claiming what you want.
Eclipse Season	Twice a year, roughly 6 months apart	Solar and lunar eclipse within about two weeks. Stay open and flexible rather than locking plans in.
Fall Equinox	Around September 22	Balance point. Evaluate what is actually working before the year winds down.
Samhain	October 31	Veil is thinnest. Connecting with loved ones who have passed, plus release work.
Pleiadian Portal	Late November	Alignment with the Pleiades. Good for tuning into intuition and bigger downloads.
Winter Solstice	Around December 21	Peak of dark. Turn inward, rest, and reflect before a new cycle begins.

Quick reminder: you don't need a full ritual to work with any of these. Five quiet minutes and an honest question to yourself counts.
